

SYED ANS FRAZ

Software Developer

Gmail - ansshah6516@gmail.com | Ph# +92 309 6262822 | GitHub - syedansfraz

A passionate software developer eager to learn and grow through building impactful solutions. I thrive on solving challenges, exploring new technologies, and turning ideas into functional, user-friendly applications. With a strong focus on innovation and collaboration, I aim to create meaningful tools that make a difference.

PROJECTS -

Point of Sale (POS) System -

Built a comprehensive POS application with inventory management, billing, and user authentication. Successfully implemented secure login functionality and real-time inventory updates.

Technologies - C#, SQL Server, .NET Framework

E-commerce Web App -

Developed a user-friendly e-commerce platform with payment gateway integration and product management. Optimized site performance, achieving faster load times and higher user engagement.

Technologies - MERN Stack

Employee Management System -

Designed a system for HR departments to manage employee details, track attendance, and generate reports. Focused on usability and efficiency, integrating advanced search functionalities.

Technologies - Flutter, Firebase
